

# THANK YOU FOR VISITING LA PALMERA!

Following are a few health and safety guidelines for shoppers along with measures La Palmera is taking to help curb the spread of germs and viruses.

Although masks are no longer state mandated, for the health and safety of our guests, La Palmera strongly encourages guests to wear masks while in common areas throughout the mall.

La Palmera employees, including management, security, maintenance and housekeeping, as well as vendors of La Palmera, are required to wear masks while on property.

Individual retail and dining locations determine their own guidelines regarding mask requirements, occupancy, etc. to be enforced within the confines of their lease space.

Freestanding alcohol-based hand sanitizer dispensers are in place throughout the mall including all mall entrances.

We continue to utilize stepped-up cleaning and hygiene practices, including the use of CDC-approved cleaning supplies throughout the mall.

Cleaning and disinfecting areas most susceptible to the spread of viral germs is a top priority, including our restrooms, door handles, escalator handrails, and other areas the public commonly touches.

If an individual shop or eatery feels too busy for your own comfort level, we invite you stop back by at a later time.

The mall continues supporting “to-go” efforts of its tenants through our “La Palmera Curbside Pick-Up” program, allowing guests to make a purchase by phone, online or through an app from a participating merchant, and then park for pick-up in the appropriate color-coded zone.
